

iSee Modular PushGlide

Pushing Brands Forward

Maximize any amount of shelf space with the new iSEE Modular PushGlide. With the same self-facing technology of our original PushGlide system, the Modular PushGlide offers a truly customizable solution. There is no fixed size for the Modular PushGlide: the bases and walls easily interlock and each channel has a flexible depth to allow the system to be as wide or as narrow, as deep or as shallow as your space allows. With two base size options, it can merchandise a wide range of products from slim cans to tetra packs to 25oz cans. Modular PushGlide comes in black, but any custom color can be special ordered.

Features and Benefits

Extensive Modularity

Endless size, width and color variations allow customer to create a display that fits their unique needs.

Optimizes Shelf Space

Increases volume by keeping product at the front and ready to grab.

Flexible Depth

Modular PushGlide has tear-off sections every 2 inches to allow it to fit anything from an 18 inch shelf to a 27 inch shelf.

Easy Assembly

No tools and minimal instructions are needed to put together this display—locks together as easily as Legos!

Multiple Branding Options

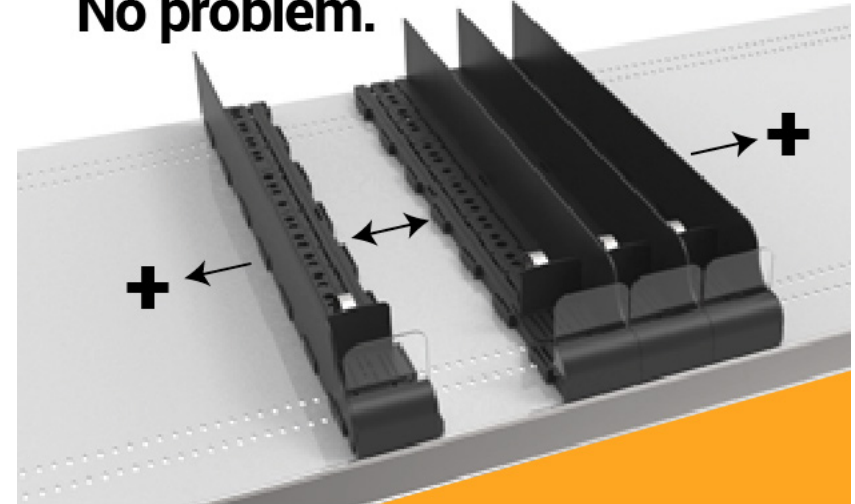

Artwork can be added per-channel or across the entire Modular PushGlide system.
